

SHARE THE CHAIR. NOT THE MESS.

Let's face it – people are messy.

For those of us spending eight to twelve hours in a chair that's shared with other workers, this can sometimes be a nose-pinching reality. Sure, fabric freshener sprays can help mask bad smells, but not for long. And what about those stubborn stains on the upholstery?

The latest innovation from Concept Seating nearly eliminates the pains of chair hygiene in multi-shift workplaces.

TO [PRE]SERVE AND PROTECT

Concept Seating Slipcovers allow workers to take their messes home at the end of their shifts, leaving a fresh chair for the next person. Just toss the slipcover in the washing machine periodically to keep it fresh. This simple, effective solution not only protects and preserves the chair's surface, it can also help prevent the sharing of bacteria.

Other Benefits of Concept Seating Slipcovers:

- Easy to Install and Remove
- Machine Washable
- Cost Effective
