

# SliderMouse Pro

## Ergonomic results with navigation bar

SliderMouse Pro is a centered mouse that allows you to do desk work in comfortable, ergonomic positions – even without stretching, twisting and straining. Our cursor navigation with the intuitive mechanical navigationbar is integrated on top of the SliderMouse Pro, allowing your hands the freedom to rest snugly on the entire width of the mouse. To make it your own, we have made it seamless to design it to match your preferences with magnetic wrist rests in various sizes and materials. SliderMouse Pro is designed and developed in Scandinavia in collaboration with ergonomic experts.

All hard plastic parts are made by 100% PCR plastic and with certified packaging.

## Take care of your body

With a centered mouse, your arms are placed in a natural, relaxed position in front of your body. This supports a tension-free posture for shoulders, arms, and elbows that completely changes your ergonomic working position. Now, you can use both your right and left hand for cursor navigation. Also, you can control the clickable navigationbar with a light touch of your fingertips and have all your favourite functions within short reach.
