NEXT24

Working mission-critical shifts?
You have our everlasting support.

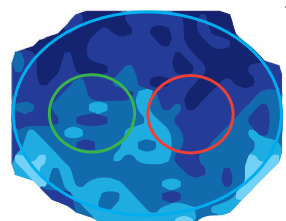

COMFORT BY DESIGN

IT WORKS. SO YOU CAN WORK.

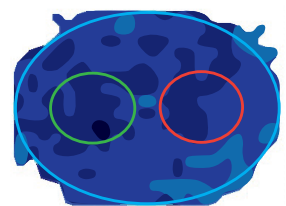

NEXT-LEVEL INNOVATION FOR INTENSIVE-USE SEATING

Next24 is the only chair embedded with SKYDEX, a patented polymer technology that reduces seated pressure for a more satisfying sitting experience. Combined with the ergonomic design and reliable support of the BodyBilt seat pan, it provides long-shift comfort that conventional foam solutions simply can't touch.

24|Seven Seat Pressure Map

Next24 Seat Pressure Map

COMFORT ON A CURVE

The SKYDEX technology inside every Next24 uses expertly engineered geometries to better distribute seated pressure. For the user, this means **43%** more comfort, **56%** improved impact mitigation and **10x** the durability of standard foam.

The pressure map images to the left show the additional comfort of Next24 compared to BodyBilt's 24|Seven seat. Regions of darkest blue reflect the areas of lowest seated pressure, bringing more comfort to the user.

Next24 pairs SKYDEX technology with the BodyBilt seat pan, ergonomically engineered for seated comfort. Three different sizes, along with two contour options for Size A, allow the seated shift worker to further customize Next24's comfort. These seat options allow Next24 to perfectly position a greater percentage of your workforce.

NEAT NECK SUPPORT

The optional neckroll on Next24 is designed to support the curve of your neck and take the weight of your head off your neck and shoulders.

4-ARM STABILITY

BodyBilt's height-adjustable 4-Arms provide both ergonomic adjustment and stability.

STURDY STEEL CONSTRUCTION

From the heavy-duty cylinder to the reinforced steel brace bars and additional steel plate, Next24 is designed for long-term life and durability. Three different cylinder height options (short, standard, and tall) allow you to choose the correct height for your comfort.

CHOICE OF OPTIONS

Next24 offers the option of three different casters (3" hard surface, 3" soft surface, and 2" chrome) as well as either a six-star or five-star base.

TIME-SAVING STYLE

The non-upholstered back of Next24 provides easier maintenance so you can stay focused on your most critical tasks.

LEVELS OF LUMBAR

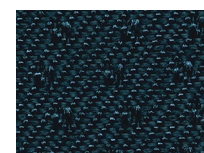

Built-in Air Lumbar allows you to adjust the level of lumbar support to perfectly meet your needs.

GREATER ADJUSTABLE RANGE

Next24's adjustments include back height and angle, seat height and tilt tension, and arm width and height adjustment for perfect positioning.
