

RollerMouse Go

Smaller in size – not in functionality

RollerMouse Go offers a compact and wireless version of Contour's renowned central mouse design, making it easy to carry around to work, home, or travel. Its unique Rollerbar design promotes a more dynamic working posture, ensuring that both hands are comfortably and naturally positioned in front of you for cursor navigation. The black cover provides both wrist support when folded along with wrap-around protection during transport.

Sustainable Materials

RollerMouse Go uses 29% pre-consumer recycled aluminum in the body of the device, ensuring we care for the environment as much as we care for our hands and wrists. The Go Dock uses 100% post-consumer recycled plastic in the body. In choosing the Go and Go Dock, you are not just investing in a high-performance ergonomic tool for yourself; you are choosing a more sustainable future by significantly reducing the demand for virgin aluminum and plastic production.

PRODUCT	CONNECTION	ITEM NO.	PRODUCT DIMENSIONS			WEIGHT (lbs)
			L (in)	W (in)	H (in)

RollerMouse Go + Dock Bundle 	Wireless	CDRMGO10213	15.4	5.3	0.9	1.28

Full-size RollerMouse using Go Dock

RollerMouse Go Dock converts the compact RollerMouse Go to a standard width for optimized wrist rest support while mousing and typing. The mouse is magnetically attached to the dock, making it simple to dock and undock.

Pair this Go and Go Dock with the Balance Keyboard for a perfect fit between the home, the office work desk, or anywhere in-between.
